SMASHING MOON ROCKS

Supplies

Cotton Balls
Water
Flour
Watercolors or tempera paints
Container for mixing
Foil
Cookie Sheet

Instructions

Mix equal amounts of flour and water and the color of your choice [I will use grey or black watercolors, but you can also use tempera paints], I used roughly ¼ cup of flour and ¼ cup of water. Be sure the mixture is not too thick. Add a bit more water if necessary.

Dip your cotton balls into the mixture and place onto the foil covered cookie sheet.

Bake the cotton balls for just over an hour at 300 degrees. Take out and let cool at room temperature.

Are you ready for the best part? Once the cotton balls have cooled, they are so much fun to smash. Anything will work to smash them, like the plastic hammers used her at the Preschool.

Now you have your own moon rocks!
